re: Inquiry; DRYBEDOC THE  EMBOL Language Private Communication System

USPTO Published Documents (27 scanned pages).

Application #09/822,475 Publication #US-2003-0128844-A1, 7-10-03

Following internet download and installation of QuickTime for Windows, and restarting computer, then viewing <http://pair.uspto.gov/>, following the path; Application # and Publication # search, to Published documents, to Images; selecting Images causes the computer to seize and must be forced to quit QuickTime.

The QuickTime Images (27 scanned pages) are viewable, but not printable, using Macintosh Operating Systems, with QuickTime installed, following the same path.

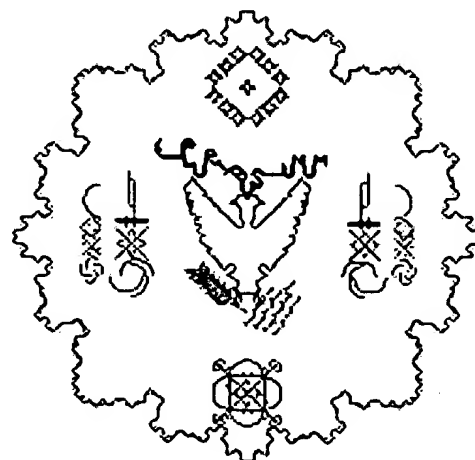

What can be done to make these Images (27 scanned pages) viewable on computers with Windows Operating System?
